PROJECTS

InfinitraX - Inventory Management System, ReactJS, HTML, CSS, JavaScript, Bootstrap, Python, Django
November 2023 – February 2024

For our Third Year Advanced Programming Techniques Group Project, we developed an Inventory Management System called as "InfinitraX". It will support efficient control of inventory, preventing stockouts, optimizing stock levels, and streamlining overall supply chain processes.

Railway Management System, HTML, CSS, JavaScript, Bootstrap, PHP, Composer
May 2023 – November 2023

In our 2nd-year 2nd-semester project, we've developed a system to automate a myriad of operations within the railway network service of Sri Lanka. It will improve efficiency through automated processes for timetables, ticketing, route information, and passenger management, addressing traditional inefficiencies.

Quizzard - Online Quiz System, HTML, CSS, JavaScript, Bootstrap, PHP
May 2023 – August 2023

For our Second Year Web Application Development Project, we developed an Online Quiz System, empowering undergraduates with self-tests, quizzes, and extensive library resources for comprehensive study materials and academic support. Main objective of this project is to work efficiently by conducting online quizzes for many competitive exams.

Spicy and Taste - Online Food Ordering System, HTML, CSS, JavaScript, Bootstrap, Java, JSP, Servlet
May 2023 – August 2023

For our Second Year Rapid Application Development Group Project, we developed an Online Food Ordering System. This system allows customers to browse menus, add items to a cart, put orders, view their bill total and get their orders. Main objective of this project is to create a web application that works efficiently for customers.
